Products need labeling

Label printers
for industrial applications

MACH 4S
Made in Germany

MACH 4S

Key features

MACH 4S
Label printers for industrial applications

The **MACH 4S** provide all features of an industrial printer with a wide application range.

The print mechanics and the chassis are made of high-quality materials and perfectly match in terms of shape and function.

The large, colored touchdisplay with self-explanatory symbols offers best operability.

Labels and ribbons are easy to insert from the front.

The centered material guide eliminates any need of adjustments.

The hightech electronic board integrates all the needed interfaces as standard and is ready for any connection.

- reliable and fast printing
- accurate imprint
- compact, appealing design
- easy operation
- little footprint

Sample applications:

PCB labels
When only little space is available – smallest label size 5 x 5 mm

Type plates
Pin sharp fonts, graphics and barcodes up to 600 dpi

Cardboard box and pallet labels
up to a passage width of 120 mm

Types

Material guide
centered

Type B with tear-off edge

for printing on all materials that are wound
on rolls or reels or fanfold.

Label printer		MACH 4.3S		MACH 4S	
Printable resolution	dpi	203	300	300	600
Print speed	up to mm/s	300	300	300	150
Print width	up to mm	104	108.4	105.7	105.7

Type P with peel-off function

for printing on all materials that are wound
on rolls or reels or fanfold. In addition, the labels can be dispensed.

Label printer		MACH 4.3S		MACH 4S	
Printable resolution	dpi	203	300	300	600
Print speed	up to mm/s	300	300	300	150
Print width	up to mm	104	108.4	105.7	105.7
Label height	from mm	12			

Type C with cutter

for printing on all materials that are wound
on rolls or reels or fanfold. From 12 mm in height,
the labels and continuous materials can be cut.

Label printer		MACH 4.3S		MACH 4S	
Printable resolution	dpi	203	300	300	600
Print speed	up to mm/s	300	300	300	150
Print width	up to mm	104	108.4	105.7	105.7
Cutting length	from mm	12			
Gap height	up to mm	2.5			
Cuts/min, without material	up to	100			
Stop print job when		final cutter position has not been reached			

Accessories

External rewinder ER4/210

Label winding is either outside or inside. An adapter kit for exact
alignment of the external rewinder is included in the delivery.

External rewinder		ER4/210
Material width	up to mm	120
Roll diameter	up to mm	210
Core diameter	mm	40 in cases of a rewind axle or a cardboard core 76 in cases of a cardboard core and an adapter
Winding		outside or inside

Details

❶ Cover with a large panoramic window

It can be opened wide. The integrated damping mechanism provides smooth closing. Label stock is visible at any time.

❷ Roll holder

The label roll is put onto the holder and, at this, is automatically centered. Materials of different widths can be placed within the box.

❸ Ribbon holder

The ribbon is pushed onto the spring-mounted holder and is centered by means of a margin stop and the position indication. The insertion in the print mechanics is simple and comfortable.

❹ Print mechanics

It opens at the push of a button and offers easy access.

❺ Print heads

All print heads are freely interchangeable. They are automatically detected and calibrated by the CPU. Major data sucha s running performance, maximum operating temperature and heat energy are directly stored in the print head. The data can be read at the plant.

❻ Gap sensor

It is arranged for labels or punch marks and end of material as well as for print marks in a centered position. In case of multi-track labels, you can switch to a sensor that is shifted 10 mm to the left.

❼ Material guide

With the lateral retaining wheel the width is adjusted. At this, the labels are automatically centered.

❽ Reflective sensor

Labels and end of material as well as print marks are identified by the slideable sensor.

❾ Print roller DR4

It can be quickly and easily unlocked in few steps for cleaning or replacement. Coating: synthetic rubber

DR4-M25

DR4-M50

DR4-M80
To achieve accurate imprint with slim materials and ribbons slim print rollers are needed. These prevent from print roller wear, print head contamination and errors during material feed.

**❿ Peel-off function** (with "P" type)

The liner tape is lead down behind the operation panel. The label separates from the liner tape on the peel-off edge. In terms of application safety, label peel-off has to be tested.
Operation panel

**Intuitive and easy operation with self-explanatory symbols
to configure the device setups**

1 LED signal: Power ON

2 Status bar: Data reception, Record data stream,
Ribbon pre-warning, SD memory card / USB memory stick plugged,
WLAN, Ethernet, USB Slave, Time

3 Printer status: Ready, Pause, Number of printed labels
per print job, Label in peel-off position, Awaiting external start signal

4 Operation

Cutter: cutting
Tear-off or peel-off mode: print label

Jump to menu

Reprint last label

Interrupt and continue print job

Stop and delete all print jobs

Label feed
**Setup options**

Printing parameters
Print position Y

Print speeds

External operation panel

If the operation panel of a printer cannot be accessed,
an additional external one can be plugged.

Same functionality as on the printer
Landscape or portrait mode
Operability as desired on the external operation panel or on the printer

Printer connectivity: USB 2.0 Hi-Speed device

1 LED: Power ON

2 USB port to plug a service key or a memory stick,
to transfer data to the IFFS memory

3 Connecting USB cable for power supply
cab provides specified cables. Lengths are 1.8 m to 16 m.

Video tutorials

Interfaces on the back of the device
1 Slot for a **SD memory card**

2 **2 x USB host** to connect a Service Key, USB stick, keyboard,
barcode scanner, USB WLAN stick, external control panel

WLAN hotspot or infrastructure mode: In hotspot mode it is possible
to directly connect a mobile device with the printer via WLAN.

3 **USB 2.0 Hi-speed device** to connect a PC

4 **Ethernet 10/100 Mbit/s**

5 **RS232C** 1,200 to 230,400 baud/8 bit

Label software cablabel S3

Designing, printing, administrating with cablabel S3

cablabel S3 opens up the full potential of cab devices.

First of all, the label must be designed. Only when it comes to printing
it has to be decided whether the label shall be processed on a label printer, a print and apply or marking laser system.

cablabel S3 is of a modular design which makes it adaptable to requirements step by step. To support functions like native JScript programming, elements such as the JScript Viewer are embedded as plug-ins. The designer user interface and the JScript code are synchronized in real time. Special functions like the Database Connector or barcode testers can be integrated.
1 Toolbar
to create different label objects

2 Tabs
to quickly switch from one running
label design to another

3 Layers
to administrate different label objects

4 Designer
simplifies the design and displays the label WYSIWYG

5 Printer spooler
to monitor all print jobs and the state of the printer

6 Drivers
for setting and the communication with devices

Printing in stand-alone operation

This operating mode is the printer's ability to select and print labels even when it is not connected to a host system.

The label has to be designed with a software such as cablabel S3 or by direct programming with a text editor
on a PC. Label formats, texts, graphics as well as database contents are stored on a memory card,
a USB memory stick or in the internal IFFS memory.

Only variable data are sent to the printer via a keyboard, a barcode scanner,
scales or other host systems and/or recalled by the Database Connector
from the host and printed.

For further information see
www.cab.de/en/cablabel

Printer control and administration

Printer drivers

cab provides drivers to control a printer with software other than cablabel S3.

Free download on **www.cab.de/en/support**

Printer programming

JScript

To control the printer, cab has developed the embedded programming language JScript. See manual for free download at **www.cab.de/en/programming**
abc Basic Compiler

In addition to JScript and as an integral part of the firmware, it allows advanced printer programming before data are sent to printout. For example, external printer languages can be replaced without interfering in the current print job. Also data from other systems such as a scale, a barcode scanner or PLC can be integrated.

Printer integration

Printer Vendor Program

As a partner in SAP's[1] Printer Vendor Program, cab has developed a replace method to enable easy control of a cab printer via SAPScript from SAP R/3. Only variable data are sent to the printer by the host. Pictures and fonts that had priorly been stored in the local memory (IFFS, memory card, etc.) are merged.

Step 1	Step 2	Step 3
Create a label and a replace file with cablabel S3	Use the replace file and replace the variable data in SAPScript	Printout from SAP

[1] SAP and all corresponding logos are trademarks or registered trademarks of SAP SE

Printer administration

Configuration in Intranet and Internet

The HTTP and FTP server integrated in the printer via standard programs like a web browser or FTP clients allows printer control and configuration, firmware updates and memory card administration. Via email or SNMP, the SNMP and SMTP client datagram sends status, warning and error messages to administrators and users. Time and date are synchronized by a time server.
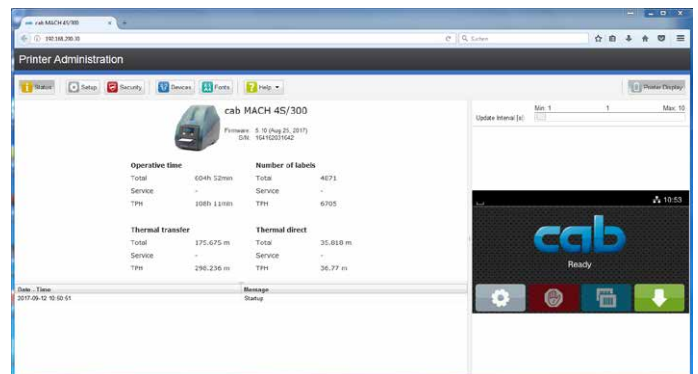

Database Connector

Printers connected to a network may directly access data from a central ODBC or OLEDB-ready database and print it on a label. While printing, data can be rewritten to the database.
